#### Description

Vladimir Nadvornik reported:

Is this supposed to work? It gives me 'No namespace info available for XMP prefix `ns' exception.

```
Exiv2::XmpData xmpData;
```

```
Exiv2::XmpProperties::registerNs("myNamespace/", "ns");  
xmpData["Xmp.ns.test"] = "myvalue";
```

```
std::string xmpPacket;  
if (0 != Exiv2::XmpParser::encode(xmpPacket, xmpData)) {  
    throw Exiv2::Error(1, "Failed to serialize XMP data");  
}  
std::cout << xmpPacket << "\n";
```
