

Exiv2 - Patch #716

missing header in canonmp.cpp

23 Jul 2010 17:42 - Pavel Heimlich

Target version:	0.21		

Description

on opensolaris with sun studio 12u1 the build of exiv2 0.20 fails with the below messages.

The attached patch fixes that by adding the missing std header. Apparently gcc somehow figures that out by itself, but studio needs to have it explicitly.

```
pkgbuild: /usr/bin/CC -I/usr/include/stdcxx4/ansi -I/usr/include/stdcxx4 -library=no%Cstd -library=Crun
-features=anachronisms,except,rti,export,extensions,nestedaccess,tmplife,tmplrefstatic -instances=global -template=geninlinfuncs -s
