

Exiv2 - Bug #987

Strange wording of Exif.Photo.SensitivityType

05 Sep 2014 11:30 - Thomas Beutlich

Status:	Closed	Start date:	05 Sep 2014
Priority:	Normal	Due date:	
Assignee:	Robin Mills	% Done:	100%
Category:	documentation	Estimated time:	0.00 hour
Target version:	0.25		

Description

It reads in tags.cpp and <http://exiv2.org/tags.html>

```
N_("The SensitivityType tag indicates PhotographicSensitivity tag. which "  
"one of the parameters of ISO12232 is the Although it is an optional tag, "  
"it should be recorded when a PhotographicSensitivity tag is recorded. "  
"Value = 4, 5, 6, or 7 may be used in case that the values of plural "  
"parameters are the same."),
```

Should it be?

```
N_("The SensitivityType tag indicates which one of the parameters of "  
"ISO12232 is the PhotographicSensitivity tag. Although it is an optional tag, "  
"it should be recorded when a PhotographicSensitivity tag is recorded. "  
"Value = 4, 5, 6, or 7 may be used in case that the values of plural "  
"parameters are the same."),
```

Thank You Thomas for spotting this garbled message. Your guess about the correct wording seems plausible and I have submitted a fix r3354.

I believe the web pages are generated from the code, so having submitted this fix, the HTML code will be revised when we publish v0.25 in November.
