Description

Hi,

I found some typos in the English text when reviewing a translation of exiv2. Below is what I found and my spelling proposals:

"ballance" * 2, should most likely be "balance".

"CameraClalibration" -> "CameraCalibration"

"idenfication" -> "identification"

"maxinimum" (2 of this one) -> "maximum"

"Mininimum" (2 of this one) -> "minimum"

"Color matrix mumber" -> "Color matrix number"

"Refeference" -> "Reference"

"Reducton" -> "Reduction"

"Face recognation" -> "Face recognition"

"Usually used in Matroska filr type."

Should this possibly be "file type"?

Regards,

Anders Jonsson
