

Exiv2 - Bug #423

Problems with paths and -l option on Windows

06 Mar 2005 21:44 - Andreas Huggel

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Andreas Huggel	% Done:	0%
Category:	tools	Estimated time:	0.00 hour
Target version:			
Description			
1) The exiv2 utility does not work with absolute Windows paths, e.g. in: <pre>exiv2.exe ex d:\temp\a.jpg ./d:\temp\a.exv Could not open nor create the file.</pre>			
2) The -l option should prepend the directory to the filename, ont the whole path: <pre>exiv2.exe -l d:\Temp extract d:\Temp\IMG_1950.JPG d:\Temp/d:\Temp\IMG_1950.exv: Could not open nor create the file</pre>			
Additional information:			
Workaround: Change into the directory where the images are before running the command, then run <pre>exiv2.exe ex a.jpg</pre> or <pre>exiv2.exe -l d:\Temp extract IMG_1950.JPG</pre>
