

Exiv2 - Bug #440

IPTC time without timezone raises exception

08 Oct 2005 04:58 - Andreas Huggel

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Andreas Huggel	% Done:	0%
Category:	iptc	Estimated time:	0.00 hour
Target version:	0.8		
Description			
Exiv2 will raise an exception "Unsupported time format" when reading an invalid time. This was caused by an IPTC time without mandatory timezone information.			
Exiv2 should			
1) not panik but just skip a dataset if it can't read it and			
2) be able to read a valid time in HHMMSS format without timezone information to cater for buggy IPTC writing software.
