Target version:	0.18.2		

Description

I'm updating Polish tranlation file of exiv2 0.18.1 and I've found two small bugs in original English file connected with Exif GPS tags. I think this should be corrected in original POT file.

entry# is should be (expl.)
2749 GPS tag 5, 0x5. Indicates whether the altitude is above or below sea level. GPS tag 5, 0x05... (missing 0)
2771 GPS tag 16, 0x10. Reference for movement direction. GPS tag 16, 0x10. Reference for image direction (not that tag!)

Regards,
