

Exiv2 - Bug #698

CMake Error at po/cmake_install.cmake:36

20 Apr 2010 13:37 - Frank Hommes

Status:	Closed	Start date:	20 Apr 2010
Priority:	Normal	Due date:	
Assignee:	Gilles Caulier	% Done:	100%
Category:	build	Estimated time:	0.00 hour
Target version:	0.24		
Description			
bash:\$ make install			
CMake Error at po/cmake_install.cmake:36 (FILE): file called with unknown argument "/usr/share/locale"/fr/LC_MESSAGES". Call Stack (most recent call first): cmake_install.cmake:55 (INCLUDE)			
When I comment this part out the error will go on with the pl/LC-MESSAGES.
