

Exiv2 - Patch #881

One more Olympus lens - the list is complete.

Target version:	0.24		
Description			
This patch adds the last missing lens to the Olympus list. I have compared the list with www.four-thirds.org and now all FT and mFT lenses are accounted for.

Fix submitted: [r2982](#). Thanks Niels for the patch.

Niels:

I would be very happy for you to have write access to the depot and you can submit patches directly. If you're interested in contributing to exiv2, I'm sure Andreas will be happy to accept your help.

Hi Robin.

I will be happy to contribute. At least I can look into some of the issues reported and check patches that come in. Do you contact Andreas wrt write access?

Regards,
Niels Kristian

Niels

I'm very pleased and happy about the contributions you've made recently to exiv2. The most common issue that is reported about exiv2 concern updates to maker notes for new camera models and accessories. So I've created a Wiki page to say how I'd like folks to submit those requests. Your comments about the page will be very welcome.

http://dev.exiv2.org/projects/exiv2/wiki/How_do_I_request_changes_to_Maker_Notes_for_New_Camera_Models_and_Accessories

I've written this based on my experience of what makes for a very quick turn-around for those requests. Any comments/criticisms you'd like to make about the page will be most welcome (on this thread).

Thanks.

Robin

That'll be wonderful. Yes Andreas has to both approve and get this set up.

I believe Andreas reads most the forum and issue correspondance. If he doesn't respond in a day or two, I'll email and sing your praises!
