#### Description

Here is the lens id for the Pentax SMC DA 18-135mm f/3.5-5.6 ED AL [IF] DC WR :  
LensID: 0x08d7

I've attached a patch to add the corresponding line into the pentax lens database that seems to work :

```

It seems like the lens is already there in the latest code of Exiv2.  
We have recently added a lot of new Lens ID and info to the codebase.

I would recommend you to please try the latest code from Exiv2 svn repository.  
\$ svn checkout svn://dev.exiv2.org/svn/trunk

<http://www.exiv2.org/download.html>

For now I would be marking this issue as resolved.

If there still exist some missing lens ID, then please feel free to inform us. We would be more than happy to help.

Thank you for your active participation.
