Target version:	0.26		
Description			
<p>Could you please add support for the 1 NIKKOR 10mm f/2.8. I use this lens with both the Nikon 1 J3 and the Nikon 1 J4. I am trying to get a lensfun profile set up to do corrections on aerial imagery for my thesis. Adobe Lightroom is too much work for not enough gain, but I can't seem to get my mil-nikon.xml addition to show up in Darktable or Digikam.</p> <p>Exiv2 output:</p> <pre>exiv2 -pt DSC_7041.NEF grep -ai lens Exif.Nikon3.LensType Byte 1 (16) Exif.Nikon3.Lens Rational 4 10mm F2.8 Exif.Nikon3.LensFStops Undefined 4 8 Exif.Nikon3.LensData Undefined 879 (Binary value suppressed) Exif.Photo.LensModel Ascii 64 1 NIKKOR 10mm f/2.8</pre> <p>According to Darktable's Image Information Panel, the proper name is 1 NIKKOR 10 f/2.8. Link to official webpage found here: [[http://www.nikonusa.com/en/nikon-products/product/nikon1-lenses/1-nikkor-10mm-f%252f2.8.html#tab-ProductDetail-ProductTabs-TechnSpecs]]</p> <p>Cheers</p>
