Description

Fixes submitted: [r4656](#)

I installed Ubuntu 16.10 on my laptop today and it arrived with GCC 6.2.0. Samples won't compile nor link. The build flag ***GCCFLAGS=-std=gnu++98*** fixes this.

I've update the project build files for CMake and autotools.

GCC 6.2.0 also emits a couple of warnings and I've tweaked the code appropriately to calm him down.
