

Exiv2 - Bug #1000

trivial: samsung lens id re-sorting

19 Nov 2014 17:20 - Pascal de Bruijn

Status:	Closed	Start date:	19 Nov 2014

Target version:	0.25		
Description			
I just noticed there is a lens out of order in samsungmn.cpp:			
<pre>{ 4, N_("Samsung NX 20-50mm F3.5-5.6 ED") }, { 6, N_("Samsung NX 18-200mm F3.5-6.3 ED OIS") }, { 5, N_("Samsung NX 20mm F2.8 Pancake") },</pre>			
It's a trivial change to swap around. Give me a bump if you'd like me to do a patch.

Issue: #1000 Cosmetic code sorting issue.

History

#1 - 19 Nov 2014 17:57 - Robin Mills

Congratulations Pascal on getting [#1000](#). I was thinking of posting something minor just to get number 1000.

Are you concerned about the sorting in the code, or is the number incorrect? Which of the following is correct:

1) Cosmetic code change to sort by index:

```
{ 4, N_("Samsung NX 20-50mm F3.5-5.6 ED")           },
{ 5, N_("Samsung NX 20mm F2.8 Pancake")             },
{ 6, N_("Samsung NX 18-200mm F3.5-6.3 ED OIS")     },
```

2) Index has been changed:

```
{ 4, N_("Samsung NX 20-50mm F3.5-5.6 ED")           },
{ 5, N_("Samsung NX 18-200mm F3.5-6.3 ED OIS")     },
{ 6, N_("Samsung NX 20mm F2.8 Pancake")             },
```

Ah, I hadn't noticed regarding my ticket number... Did I win a fridge or something? :D

I merely noticed the id sorting in the code was off... So the actual tuples themselves should be fine. So it's mostly a code cosmetic issue.

So number one it is. And I'm aware I'm nitpicking a bit :)

You're not nit picking - you're bagging [#1000](#). Fix submitted [r3389](#).

Congrats on [#1000](#). You don't win a fridge, however if you're in New York State, you've won a deep freeze (1.5m of snow last night). If you're not in New York State, you've won a Great Escape. And no matter, you get a photo of the last rose of summer in my garden. FallRose.jpg
