

Exiv2 - Bug #1288

site defaults to http://, and https:// certificate is bogus

08 Apr 2017 15:30 - Matthias Andree

Status:	Closed	Start date:	08 Apr 2017
Priority:	Normal	Due date:	
Assignee:	Robin Mills	% Done:	100%
Category:	website	Estimated time:	1.00 hour
Target version:	0.27		
Description			
<ol style="list-style-type: none">1. The web site links usually point to http://dev.exiv2.org/ (not the https://)2. The web site certificate for dev.exiv2.org does not mention the hostname in its CommonName (or subjectAltName), and is self-signed, so is untrusted by browsers.			

History

#1 - 08 Apr 2017 16:04 - Robin Mills

- Status changed from New to Assigned
- Assignee set to Andreas Huggel
- Target version set to 0.28

I'm assigning this to Andreas as he has the credentials for the web site. I don't think this is a serious matter. With Safari on MacOS-X, you can update the browser to always trust this certificate.

#2 - 26 Apr 2017 20:02 - Robin Mills

- Assignee changed from Andreas Huggel to Robin Mills

#3 - 16 Nov 2018 09:24 - Robin Mills

- Status changed from Assigned to Closed
- Target version changed from 0.28 to 0.27
- % Done changed from 0 to 100
- Estimated time changed from 5.00 h to 1.00 h

I'm closing this issue as part of the Exiv2 v0.27 Review process. The website and web-server will be changed in December 2018.
