

## Exiv2 - Feature #1312

### Metadata iTxt/zTXt blocks in PNG files

05 Sep 2017 20:11 - Arnold Wiegert

<b>Status:</b>	New	<b>Start date:</b>	05 Sep 2017
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	image format	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	1.0		
<b>Description</b>			
Please make it possible for exiv2 to support these			

#### History

##### #1 - 06 Sep 2017 14:00 - Robin Mills

- Category set to image format
- Target version set to 1.0

There is a discussion about this here: <http://dev.exiv2.org/boards/3/topics/2944?r=2951#message-2951>

I think it will be quite some time before this matter will get attention. Exiv2 supports Exif, IPTC, XMP and ICC metadata in a wide range of image formats. We aim to be a cross-platform, cross-format, image-standards library. As nobody has requested support for "PNG Only" metadata, there does not appear to be a strong demand for this feature. For sure, to justify the "business case" to invest effort, I'd want strong evidence that this type of metadata is in common use by major applications such as the Adobe products.

##### #2 - 31 Oct 2017 15:13 - Robin Mills

Arnold: I hope you are well. An update on this issue. Another user has raised this: <https://github.com/Exiv2/exiv2/issues/147>

##### #3 - 20 Nov 2017 22:30 - Marco Martins

Hi Arnold, just to let you know I will try to implement this feature. Please continue to follow more about this at <https://github.com/Exiv2/exiv2/issues/147>
