

## Exiv2 - Bug #451

### Invalid Exif tag created for user comment

02 Feb 2006 20:19 - Andreas Huggel

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Andreas Huggel	<b>% Done:</b>	0%
<b>Category:</b>	exif	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.9.1		
<b>Description</b> An invalid Exif tag is created when a user comment tag is added to an image. The problem does not occur in non-intrusive write mode. This means, if an existing comment tag is modified, the result is ok. But if a new user comment is added to an image, which doesn't have a comment yet, the result will be an invalid Exif tag. The invalid tag has a type id 0x000e instead of 0x0007.			
<b>Additional information:</b> This problem was introduced in version 0.8, due to an incorrect fix for bug <a href="#">#445</a> .
