

Exiv2 - Bug #452

Non-intrusive writing does not update IFD

02 Feb 2006 21:10 - Andreas Huggel

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Andreas Huggel	% Done:	0%
Category:	exif	Estimated time:	0.00 hour
Target version:	0.13		
Description			
Eg, tag type information of a tag is not updated in non-intrusive mode. This means that the new tag data is written but any change of type will not be reflected if a tag is modified with less or the same number of data bytes as the existing tag.			
Additional information:			
Design issue. Should be taken into consideration for the new TIFF parser.
