

Exiv2 - Bug #501

IPTC field parsing is still too strict: shouldn't fail if the type is not as expected

17 Dec 2006 22:36 - Andreas Huggel

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Andreas Huggel	% Done:	0%
Category:	iptc	Estimated time:	0.00 hour
Target version:	0.13		
Description			
<p>When exiv2 parses an IPTC field which is expected to contain a date or time value, it will fail with an "Unsupported time/date format" error if the format can't be parsed and not read the field. Instead it should not depend on the content to be a time or date value and fallback on a string type if the first attempt fails.</p> <p>Reported by Elsa Nordh.</p>
