<b>Description</b>			
<p>There seem to be another format that libexif reads and exiv2 doesn't. Actually, it is not an official Minolta format, since the G500 doesn't officially have raw support. These files are created with some hack. You can download a sample file from:</p> <p><a href="http://ufraw.sourceforge.net/PICT9451.MRW">http://ufraw.sourceforge.net/PICT9451.MRW</a></p> <p>(Reported by Udi Fuchs)</p>
