Description

Some newer files didn't have SVN properties set such as `svn:eol-style` and `svn:keywords`, the attached patch fixes this. I've also straightened some other properties:

- Most `.hpp/.h` files had only `Rev` set while some had `Rev` and `Id`, now all `.hpp` files only have `Rev` (none need `Id`).
- Most `.vcproj` had `svn:eol-style` set to `native`, now they all do (and I removed `svn:keywords` on the few that had them).
- Some properties were set to `"Id Rev"` (note the single quotes) or `"Rev Id"`, these were changed to `"Id Rev"`.

Note that some files not only had their properties changed, but also their content. In some cases this is because a file didn't have `keywords` set yet, but did use them (perhaps before in a different branch). But in other cases the entire file is changed and this appears to be a side-effect of setting `svn:eol-style` to `native` (probably those that used a different line-ending than whatever my editor uses). I surely didn't do anything but change properties (diffing while ignoring end-of-line/whitespace changes should show this).

History

#1 - 15 Dec 2008 09:00 - Andreas Huggel

- Status changed from *New* to *Resolved*
- Target version set to *0.18*

[r1703](#)

#2 - 15 Dec 2008 17:37 - Andreas Huggel

- Assignee set to *Andreas Huggel*

#3 - 17 Dec 2008 09:11 - Andreas Huggel

- % Done changed from *0* to *100*

#4 - 18 Dec 2008 18:29 - Andreas Huggel

- Status changed from *Resolved* to *Closed*
